

“Give Kids a Smile Day”

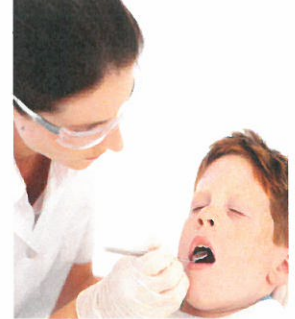

February 23, 2018

The top unmet health care need for children is dental care. The American Dental Association is sponsoring the “Give Kids a Smile Day” program on February 23, 2018.

Shelby County dentists have chosen to participate as well by treating a select group of children in need of dental care.

The child must meet the following guidelines in order to be selected to participate:

1. Have **NO** dental insurance
2. Is **NOT** on Medicaid
3. Have the sign-up form completed and returned to the school nurse by February 16th.
4. **2nd to 8th grade** students **ONLY!**

The “Give Kids a Smile Day” will be February 23, 2018 at Compassionate Care, located at 124 N. Ohio St, Sidney, Ohio.

The visit **REQUIRES** an appointment.

Local dentists will be screening eligible students at the Compassionate Care facility. If the child needs follow-up treatment, the local dentists have agreed to provide treatment for the next 6 months at **NO CHARGE**. After 6 months, the dentist has no obligation to continue treating the student.

If interested, use the sign up form on this flier, have the student return the bottom portion of the form to her/his teacher. You will be contacted by the Sidney-Shelby County Health Department and an appointment will be made at that time. Confirmation and paperwork will be sent home after the appointment is made. Please complete forms and bring them with you on February 23rd. A parent **MUST** accompany their child.

Please keep your appointment and arrive on time!

For questions or for more information, please call Erica Lentz R.N., Director of Nursing at 937-498-7249.

The Western Ohio Dental Association is excited to be in partnership with the schools, Sidney-Shelby County Health Department, Compassionate Care, and the parents to help provide dental care to area students.

It is the family’s responsibility to contact the dental office for an appointment after the initial screening. The dental office will be expecting your call and will schedule your child’s appointment. Missing one appointment during the course of treatment removes the student from the dentist’s care.
